Orbital Stripping Machines					
Crewman Orbital Strip Machines provide the greatest head pressure to deliver fast results. When equipped with a maroon surface prep pad, the Crewman Orbital Machine uses a 3,400RPM motor to cut through multiple layers of the toughest floor finish in just one pass. This machine can also be equipped with sand screens to quickly abrade and level wood floors or gymnasiums without leaving unsightly swirl marks. All models are available with an optional dust containment system to help keep your work area clean.
