

DEAD STOP

CARBON MONOXIDE DETECTOR

Test for deadly Carbon Monoxide (CO)

USE IN:

Boats
Trucks
Airplanes
Industry
Garages

USE IN:

Cars
Homes
RVs
Buses
Vans

EO12426

INSTRUCTIONS

1. Remove detector from plastic package.
2. Mount in visible location using self-adhesive strip or screw-hole provided.
3. Inspect frequently. Reaction time is 1 to 6 minutes, depending on CO level.
4. If the orange disk turns gray or black, CO is at a dangerous level.
5. Ventilate and leave the area if CO is present.
6. Investigate and correct source of CO (e.g., engine, generator, stove, heater).
7. The color reaction is reversible following exposure to fresh air. If the disk remains discolored overnight, discard it and use a new detector.

LIFE EXPECTANCY

May be stored for 3 years in the sealed package.

Use only as long as the disk remains orange.

Effective for one month after the package is opened.

Diesel fumes and some cleaning fluids may cause the disk to discolor.

WARNING: It is the buyer's responsibility to determine the appropriateness of this product for their application and to use it properly. The seller & manufacturer will not be liable for injury.
