Hako Diagnosis Main Setup 2023 - Update 00

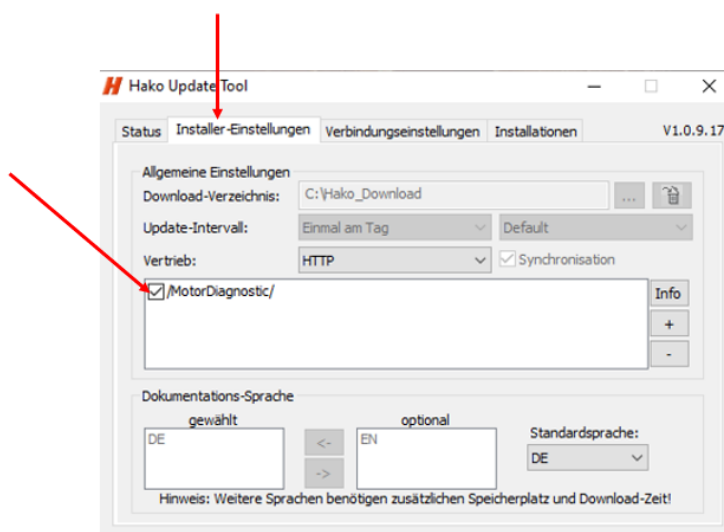

Dear Sir or Madam,

we would like to inform you that a new version of the Hako diagnosis is available for installation via the Update tool.

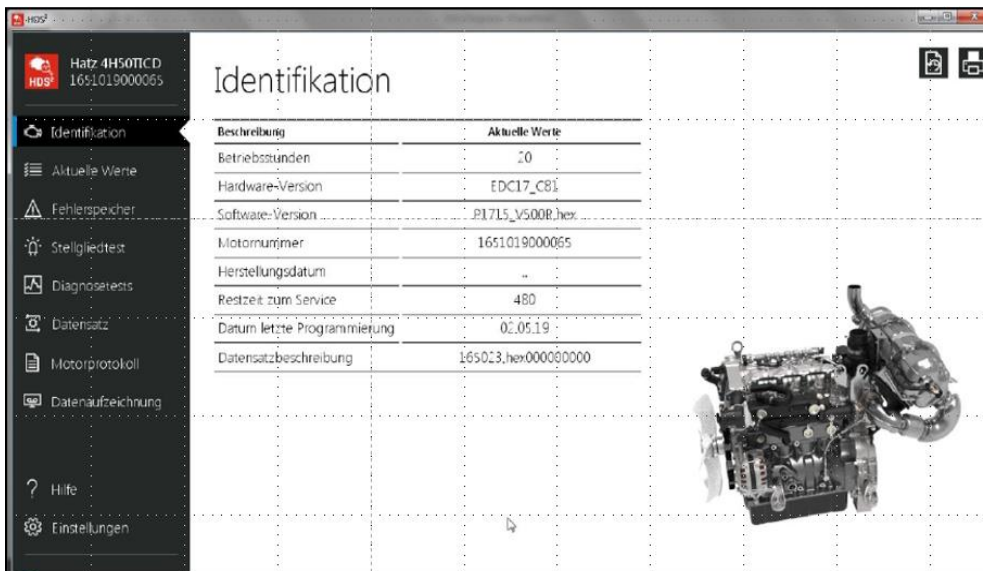

The update includes:

- The latest software versions of all Hako and Multicar vehicles
- Diagnosis Scrubmaster B25 (new)
- Information on how to perform an update of the Hatz diagnostics (short manual)

After successful installation of the Main Setup 2023, it is essential to mark the Motor Diagnostic field in the Installer Settings of the Hako Update Tool if the Hatz Diagnosis is installed on the computer.

To update the Hatz engine diagnosis, please open the Hatz diagnosis in demo mode, then activate the Hako Update Tool to start the update of the engine data sets. This is absolutely necessary for programming the engine control unit.

Please do not hesitate to contact us if you have any questions.
