Markus – You would require the two (2) radiator hoses which are part # 3332643 and part # 3335853 and the LPG Vaporizer to Engine hose material would be Part # 3220-1207 (sold by the foot).

Thank you!
Dennis

Dennis,
the two radiator hoses and the two hoses from the engine to the vaporizer.

Freundliche Grüße / Best Regards

Markus – Yes the engine number comes back as 1DU9856. So you need the radiator hose part numbers only?

Dennis,
the machine S/N is 757420404361
the engine S/N is 1DU?856. The first number is damaged by the fire; it was maybe a 9.
But nevertheless the water hoses should be, on all engines we´ve got, the same.

Dennis,
that would be a problem. This engine has burned. There are no hoses left. I need p/n for all hoses related to the cooling circuit. I saw a few in the a assembly instructions, but there are no p/n.

Markus – We found very little documented information on the 1800 GM changes. You will have to send to me photos of the parts you require and I will follow up with photos and text instructions. Attached are the current 1800 GM electrical diagrams and the hydraulic hose routings are the same as the GM 1800. The

Subject: HM1800 LP with Kubota WG1605 engine

Greg,
we have a problem with parts documentation.
We have a burned Hm1800 with the Kubota LP engine. I checked our own and the Powerboss (via internet spare part catalogues) documentation. I didn't find anything regarding the assembly/mounting of this engine in the HM1800 (or Core50).
I know that we have different hoses in the cooling circuit, that the mounting (rubbers etc.) is different etc. Could you send me such a documentation?

Freundliche Grüße / Best Regards
