### **Collision protection / protection frame for Hakomatic 1800**

Dear Business Partners,

We are happy to announce that we will take up a collision protection for the Hakomatic 1800 into the price list with immediate effect. This protection frame prevents the machine from collision damages and therefore avoids expensive failures and respectively repairs for our customers. Please note that there are two different option models for the Hakomatic 1800:

- Collision protection for HM 1800 **without** cab safety roof: order no.: 99730000 → € 1.170,- (gross list price)
- Collision protection for HM 1800 **with** cab safety roof: order no.: 99730001 → € 1.300,- (gross list price)

This is an investment that will pay off fast for our customers.

Attached you find an engineering drawing and some photos of the collision protection.

An updated price list for the Hakomatic 1800, including the protection frame, will be sent to you with the next price list amendment.

Best regards,  
Hako-Werke GmbH
