Safety Floor	•		•
Resin Floor	•		•
Wood Floor	•	•	
Sports Floor	•	•	
Stripping	•		•

TIPS FOR MAINTAINING THE BRUSHES

- 1) For enhancing the life of the brushes, wash the brushes regularly.
- 2) Store the additional brushes in a vertical position to avoid bending of bristles.
- 3) Ensure the machines storage kickstand is down when the machine is not in use.
- 4) Check the permanent bending of bristles in a particular direction. If bending is noticed, reverse the brush, hence the bent bristles are automatically straightened.
