Others:

Similar to Diagmaster, from June.11, the display version of KGST and EDIS/SI EngineTool Launcher Software will be changed.  
Old version: Ver.1.4.0  
New version: Ver.20.6.11  
(Similar to Windows 10: It means development has completed on June 11, 2020)  
It will change so as to represent date created. This makes it clear to the customer when the current version was created.
