Scrubmaster B260 R TB1230 – squeegee width now 136 cm

Dear Sir or Madam,

We are pleased to inform you that, from now on, all Scrubmaster **B260 R TB1230** machines will be equipped with a larger, 136-cm-wide squeegee (previously 126 cm) as a standard.

The wider squeegee further improves the intake of water and dirt, especially in curves. Apart from the suction width, the “squeegee 1360” is identical to its predecessor “squeegee 1260”.

All Scrubmaster B260 R TB1080 and WB1080 models will continue to be equipped with the “squeegee 1260”.

If required, the “squeegee 1360” is available as a spare part for all **B260 R TB1230** machines in the field that are still factory-equipped with the “squeegee 1260”. The spare part “squeegee 1360” can be ordered under spare part number “**01378350**”.

If you have any questions regarding ordering the spare part squeegee, please contact Spare Part Service / Customer Service.

Kind regards,

Benjamin Lindemann
