Hakomatic B400R

Modified manual for the towing device of the Scrubmaster B400R (PN 01381500)

Affected vehicles:

Chassis numbers from 7190 xy 4 0999 1

Dear Sir or Madam,

With the introduction of electronic steering on the SCM B400R (steer-by-wire), the instructions for the towing kit with spare part number 01381500 have been adapted for these machines.

Please observe these modified operating instructions for ALL machines from serial number 7190 xy 4 0999 1, as this new steering system **does not have an emergency steering function**. Please strictly pay attention to the instructions on page 9, chapter 3.5. When towing, in addition a size 19 socket wrench with extension is required for steering (not included in the kit).

Please add this updated manual (see appendix) to existing PN 01381500 towing kits.

If you have any questions, please contact Friedhelm Fechtner (ffechtner@hako.com)
phone: 0049 4531 806 450.

Best regards
